212 Smith Hall
U. Wisc., Stevens Point 54481

Oct. 71

Dear Mr. Weisberg,

I was very sorry to hear of your recent illness and hospitalization. Being so close to the date of your speech here at Stevens Point, I was very disappointed at missing the opportunity of meeting you. However, Dr. Wrone and I both felt very fortunate to have gotten such an able replacement as Mr. Lesar.

The reaction on campus to our program was excellent and I believe about 2000 persons attended Mr. Lesar's speech. Personally, I enjoyed chatting with him and benefitted greatly from this experience.

I've gotten the reaction of many students to the speech. Most agreed that it was absolutely necessary that we should go about getting a re-opening of the investigation by first examining the failures of government agencies involved rather than the men who pulled the trigger. Of course

there were those who expected Jesse to show films & slides, discuss theories and tell them "who did it". I think that attitude is unfortunate, especially when you consider the immensely important, and basic facts they seem to ignore.

I think I realize much more now what you and Jim Jesse are trying to do and I realize it is the best and only way this thing can be done right - once and for all!

Mr. Jesse's statement that you both believe the case will break soon really encourages me as well as Dr. Wrone. If you are correct, I only hope you and Jesse get the credit you obviously deserve and it makes the small things we are trying to do seem worthwhile.

Mr. Weisberg, both Dr. Wrone and myself would like to thank you for all you have done for us, and I hope you are up and

around soon.

Sincerely,

George Jeapold

UW-SP

P.S.- I'm the guy you talked to over the phone.

Also, I've included a review done by our campus newspaper on your "White-Wash II" book.

When Post-Mortem comes out, I would be very interested in purchasing a copy.

Do you think there is any significance to the letter Oswald sent to the F.B.I. which was destroyed 2 hours after his death?
